

575B ROLLBAG™

The all electric 575B tabletop rollbagger makes bag filling and sealing quick, easy and economical. The 575B substantially reduces the amount of time required over a manual opening, filling and sealing process. This bagging machine is compact, easy to use and utilizes convenient **Rollbags™** (pre-opened bags-on-a-roll).

The **575B Rollbag™** is a semi-automatic tabletop bag filling and sealing machine. The seal jaw is motor driven and activated by the foot switch, which also automatically advances the next bag to the fill position. After filling, the bag is separated at the perforation and inserted into the seal area. This electromagnetic, impulse sealing system insures strong, consistent seals in poly, food grade and anti-static pre-opened bags-on-a-roll.

FEATURES & BENEFITS

- Precise bag length control adjustment
- Fast bag repositioning control (forward or reverse) for ease of set up and use
- Front roll access for easy Rollbag mounting and threading
- Adjustable sealing/dwell controls provide precisely timed, high quality seals
- Electric foot switch for fast, efficient operation
- Portable, compact tabletop design

Easy sealing operation

Smooth, consistent seals

Rollbags™
pre-opened bags-on-a-roll

OPTIONS & ACCESSORIES

- Adjustable funnel with preparation table
- Cycle conter
- Multi-roll adapter
- Pace setter auto cycle (at a set interval) allows the user to automatically cycle the seal bar
- Adjustable height stand
- Spare parts kit
- 220V option

SPECIFICATIONS

Bag Width	2" – 12" (5cm – 30cm)
Bag Length	2" – 12" (5cm – 30cm)
Dimensions	10"D x 18"W x 24"H (25cm x 45cm x 61cm)
Seal Width	12" (30cm)
Electrical	115V, 230V (1PH/4A)
Air	None required
Shipping Weight	75 lbs (35 kg)
